Integration - REST documentation

To begin with, integration allows external ERP systems to communicate with our WMS system via Kafka. However, the integration-rest application provides a REST API through which you can send data to us via POST methods and receive data that comes from us via GET methods.

Feedback 40
Get feedback 40
JSON errors 41
Get JSON errors 41

Introduction

Communication is based on the REST architecture style, which ensures the effectiveness and efficiency of the interface. Any data sent using POST methods should be attached as JSON. However, all responses to individual requests are returned in JSON format.

Application Programming Interface (API)

http://localhost:8090/

Note:

> When sending items or a document with items, we do not want to create a new item, it is enough to fill in only the erpId in the document.positions.article section, otherwise we should complete all the required fields to create a new item.

Authorization

Each request apart from /auth/** must be enriched with an authorization header: Authorization with the content "Bearer <access_token>" e.g. "Bearer

eyJhbGciOiJIUzUxMiJ9.eyJzdWIiOiJlcnAiLCJpYXQiOjE2MzIzMjQ1MTcsImV4cCI6MTYzMjQxMDkxN30.e9WvU
tzrvMS0_t6Qr5gxSUZ_CgESJCUphA2juPZymnORI3SF7OadJ9ko2aPxMvb_G5Pn_5KBQeycD5fw5UnQxw"

Example:

```
curl -X GET "http://localhost:9090/articles" -H "accept: */*" -H
"Authorization: Bearer
eyJhbGciOiJIUzUxMiJ9.eyJzdWIiOiJlcnAiLCJpYXQiOjE2MzIzMjQ1MTcsImV4cCI6MTYzMjQx
MDkxN30.e9WvUtzrvMS0_t6Qr5gxSUZ_CgESJCUphA2juPZymnORI3SF7OadJ9ko2aPxMvb_G5Pn_
5KBQeycD5fw5UnQxw"
```

By default, the access token is valid for 24 hours and the refresh token for 7 days. To obtain a new access token, use a refresh token to obtain a new key pair. Refresh token is one-time use.

Without using the correct header with a valid access token, the server will respond with a 401 Unauthorized message.

Login

Method: POST

URL: /auth/sign-in

Sample body:

```
{
  "username": "erp",
  "password": "123"
}
```

Sample response:

```
{
  "accessToken":
"eyJhbGciOiJIUzUxMiJ9.eyJzdWIiOiJlcnAiLCJpYXQiOjE2MzIzMjQyODcsImV4cCI6MTYzMjQ

tZDVM-Eh-L1ienzc6w",
  "accessTokenExpirationDate": "2021-09-23T15:24:47.119+00:00",
  "refreshToken": "574baf5a-d786-4cbe-a2fe-6e1d36d5982b"
}
```

Refresh token

Method: POST

URL: /auth/refresh-token

Sample body:

```
{
  "refreshToken": "574baf5a-d786-4cbe-a2fe-6e1d36d5982b"
}
```

Sample response:

```
{
  "accessToken":
"eyJhbGciOiJIUzUxMiJ9.eyJzdWIiOiJlcnAiLCJpYXQiOjE2MzIzMjQzNTgsImV4cCI6MTYzMjQ
